

ECM 3 Activity's

Learning Outcome 3

Activity 1

Aim: Create an Angular application which can create Captcha.

Learning outcome: Able to develop the real time scenarios based on Node JS applications.

Duration: 5 hours

List of Hardware/Software requirements:

- Operating System – Windows 10/11 or Linux
- Command Prompt/Power Shell
- Internet Connectivity, Browser (Chrome or Edge)
- Text Editor – Notepad / IDE – Visual Studio Code/Any IDE
- NodeJS, Angular CLI

Code/Program/Procedure (with comments):

Create the Angular application

1. Let's create the application with the Angular base structure using the @angular/cli with the route file and the SCSS style format.

```
ng new angular-recaptcha --no-standalone
```

2. Right-click on the created project, open the terminal, and run this command.

```
npm install ng-recaptcha
```

3. Create a re-captcha sitekey. <https://www.google.com/recaptcha/about/>

4. Add this code into the app.module.ts

```
import { NgModule } from '@angular/core';
import { BrowserModule, provideClientHydration } from '@angular/platform-browser';
import { FormsModule, ReactiveFormsModule } from '@angular/forms';
import { AppRoutingModuleModule } from './app-routing.module';
import { AppComponent } from './app.component';
import { RecaptchaFormsModule, RecaptchaModule } from 'ng-recaptcha';

@NgModule({
  declarations: [
    AppComponent
  ],
  imports: [
    BrowserModule,
    AppRoutingModuleModule,
```

ECM 3 Activity's

```
// //////////////////////////////////////  
FormsModule,  
ReactiveFormsModule,  
RecaptchaModule,  
RecaptchaFormsModule  
,  
providers: [  
  provideClientHydration()  
,  
],  
bootstrap: [AppComponent]  
)  
export class AppModule { }
```

5. Add this code to the app.component.html

```
<h1>Recaptcha Google</h1>  
<form [formGroup]="form" >  
  <div class="mb-3 ">  
  
    <re-captcha formControlName="captcha"  
      siteKey="add your sitekey"  
    ></re-captcha>  
  
    <div class="alert alert-danger" *ngIf="f['captcha'].errors && f['captcha'].errors['required']">ReCaptcha  
is required.</div>  
  </div>  
  <button class="btn btn-primary" type="submit">Submit</button>  
</form>
```

6. Add this code into the app.component.ts

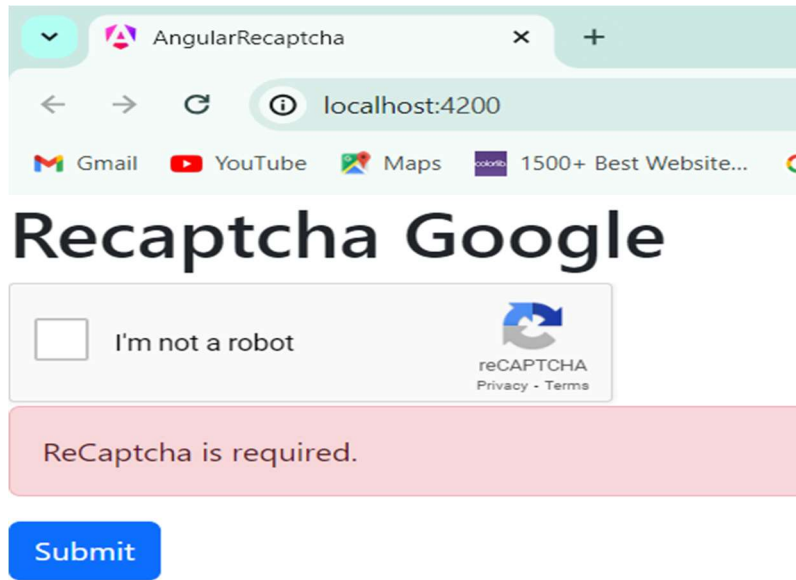

```
import { Component } from '@angular/core';  
import { FormGroup, FormControl, Validators } from '@angular/forms';  
  
@Component({  
  selector: 'app-root',  
  templateUrl: './app.component.html',  
  styleUrls: ['./app.component.css']  
})  
export class AppComponent {  
  form = new FormGroup({  
    captcha: new FormControl("", [Validators.required]),  
  });  
  get f() { return this.form.controls; }  
}
```

7. Now run the server.

ng serve -o

ECM 3 Activity's

Output:

AngularRecaptcha

localhost:4200

Gmail YouTube Maps 1500+ Best Website...
